Subject: Hold polluters responsible and give Portland a healthy river

Dear Administrator Gina McCarthy,

The present cleanup plan for the Wollamette is so loose, my children's children will never be able to fish or even swim with the normal cuts and clave arches with out the potential of toxic materials entering their bodies and never leaving.

I am appalled at how lax the deadlines are for clean up and how minimal the scope is - headlands and more must be included in the clean up efforts

Please do this right so the next group doesn't have to come in and waste more money on studies to prove what is necessary

Do it because it is right and do it for the children.

Sincerely,

(b) (6)
